

EltaMD® UV Facial Broad-Spectrum SPF 30+

Moisturizing facial sunscreen for dry and post-procedure skin

- UVA/UVB protection
- Creamy and hydrating formula

EltaMD® UV Facial Broad-Spectrum SPF 30+ is a lightweight, creamy and cosmetically elegant moisturizing facial sunscreen. Formulated for use every day, it provides moisturization while protecting against UVA (aging) and UVB (burning) rays.

EltaMD UV Facial is appropriate for all skin types, especially moderate to dry. It is ideal for use after microdermabrasion; IPL treatments; chemical and glycolic peels; and laser procedures. It may be worn alone or under makeup.

EltaMD UV Facial is fragrance-free, paraben-free, sensitivity-free and noncomedogenic.

Label uses	<ul style="list-style-type: none"> • Helps prevent sunburn • If used as directed with other sun protection measures (see Directions), decreases the risk of skin cancer and early skin aging caused by the sun
